Universidad Marino Gálvez, Quetzaltenango – Guatemala
January 2010 – November 2017

EMPLOYMENT HISTORY

Customer Representative at Telus Internation, Quetzaltenango – Guatemala
November 2017 – August 2018

Software Developer at Ciancoders,
Quetzaltenango – Guatemala
August 2018 – April 2020

I have worked developing mostly web applications focusing for web e-commerce , as well ash hybrid desktop applications for commercial flight simulations and other specif platforms fo IoT using image recognition.

PORTFOLIO

Transport Project:

Project to schedule rides, that shows the route of the ride based on the user pick up point and drop off point, and shows the price of the ride. Created with ReactJS, Redux, Google maps API, Nodejs, Feathersjs and Authorize.net to handle payment transactions.

Flight Simulator:

Desktop application that connects with a flight simulator and show the sadistics of the airship. Build with electron, ReactJS, Redux

Coffee Shop:

Web page to buy and sell coffee. Made with React, Redux, Python and Django

Dr.Go

Mobile App that connects medics and patients. Patients can review a medic's expertise and contact them with ease. It also provides tools like prescriptions reminders, so medics can bring a better experience to their patients. Build with Ionic, Angular, Django, Python
